## **ENDNOTE 20 on Windows QUICK GUIDE**

#### **CREATE AN ENDNOTE LIBRARY**

On the top menu select **File > New**. Type in the name of the library. Designate the folder where you want to save. An EndNote library consists of **two parts: a)** .enl file b) .data folder

📕   🛃 📑 =   Endnote 20				_

## ADD REFERENCES FROM DATABASES

#### WEB OF SCIENCE

- 1. Perform a search query. Select references as needed.
- 2. Go to the **Export** drop down menu and choose **EndNote Desktop.**
- 3. You can also select All Records on page or choose 1,000 records at a time for a large number of references
- 4. Under **Record Content**, choose **Full Record** (this action will export the complete information of the selected references). Click **Export**.
- 5. If using Firefox, choose ResearchSoft Direct Export Helper for direct export
- 6. For other browsers, choose Save File (.savedrecs.ciw). Within EndNote > go to File > choose Import > locate the .savedrecs file > under Import option, select Web of Science Core Collection from the drop down menu > click Import

#### OVID Databases - i.e. MEDLINE, EMBASE, APA PsycInfo, etc.

- 1. Search and select each reference as needed. Select **Export** from the results menu bar.
- 2. Change Format to EndNote, change Fields to Complete Reference
- 3. Click Export. If using Firefox, choose Open with ResearchSoft Direct Export Helper for direct export
- 4. For other browsers, choose Save File (.cgi) > in Endnote > go to File > choose Import > locate the .cgi file > under Import Option, select Medline OvidSP from the drop down menu > click Import

To export batches up to 1000, specify a range of results (e.g. 1-1000) in the Range box

# EBSCO Databases – i.e. Academic Search Complete, Business Source Complete, CINAHL, etc.

- 1. Search and then click Add to Folder (blue folder icon) for each reference needed.
- 2. Go to **Folder** from the top menu or the right hand column.
- 3. Select references for export. Click Export.
- 4. Choose Direct Export in RIS Format and then select Save.

To export **All Results**, click on the **Share** menu, under Export Results: **Email a link...** > choose **RIS Format** > select **Send.** You will be e-mailed a link to a **.zip** file. Download and extract the file into a **.ris file** > **Import** into EndNote

## **GOOGLE SCHOLAR**

- 1. Click the **Options** button (three horizontal lines next to the Google Scholar logo)
- 2. Select the **Settings** menu, Under **Bibliography Manager**, go to **Show links to import citation into** and on the drop down menu, select **Refman**, click **Save**.

Bibliography manager			
O Don't show any citation import links	s.	_	
Show links to import citations into	BibTeX		
	EndNote		
	RefMan		Reven
	RefWorks		Save

- 3. Perform your search and select citations to add to EndNote library. Choose Import into Refman.
- 4. Select **Open with EndNote 20** if using **Firefox** or save file and import using **.RIS** filter option.
- 5. You can import one reference at a time or multiple references.

You need a **Google account** to import multiple references and will need to login before selecting citations. On the results lists page, choose references by clicking on the **star icon** at the bottom of each citation. The **star icon changes into blue**. Click **Done** after selected reference(s). This actions saves the references to **My Library**.

☆ 99 Cited by 251 Related articles All 13 versions Web of Science: 69 Import into RefMan

When selection is complete, go to **My Library** (top right corner). The marked references are shown. Select All references by clicking on the **square icon** and selecting **RefMan** from the **download icon**. Select **Open With Endnote** if using Firefox or **Save File** and import using **.RIS filter** option. References are imported to Endnote.

#### **ORGANIZE REFERENCES**

Make it easy to view your references by creating groups. On the top menu, select **Groups** > Create **Group Set** or **Group** or **Smart** Group.

#### **IMPORT STORED PDF'S**

EndNote allows you to import a PDF or a folder of PDFs into your library with all the bibliographic information extracted automatically, under the condition that the PDFs have DOIs embedded. The best practice is still to import records from research databases to ensure your EndNote records are accurate and complete.

- 1. Open your EndNote library.
- 2. Under the File menu, choose Import.
- 3. If it is a single PDF, choose File; if it is a collection of PDFs placed in a folder, then choose Folder.
- 4. In the Import File or Import Folder popup window, retrieve the PDF file or folder and click OK.
- 5. Make sure the Import Option is PDF. You can choose Import All (can dedup later).
- 6. Click on the **Import** button. EndNote will try to find a **DOI** on the first couple pages of the article and if it does, it will import the complete information. If it does not find a DOI, it will import the PDF file only

#### ADD REFERENCES MANUALLY

Use this as a last resort if you are not able to import records from a database. Under the **References** tab > Add

**New Reference** > Remember to click **Save** once all the data has been entered. **Alternatively**, choose the icon on the main EndNote page and **Add a new reference** manually.

#### **FIND DUPLICATES**

Select **Library** on the menu bar> Find **Duplicates.** Compare references on the side by side window and decide which version to **Keep**.

#### FIND FULL-TEXT (FFT)

Select the references you want to find full text for by highlighting them or Select All Select **References** on the menu bar, go to **Find Full Text** > slide to the next **Find Full Text** selection If you have many references to find full text for, EndNote will search **250 references** at a time

Find the two **Find Full Text URL's** from the <u>EndNote Citation Tool</u> guide Go to the EndNote Desktop page, choose the **Find Full Text tab**. Within EndNote, select **Edit** on the menu bar, go to **Preferences** and copy and paste the **FFT url's** Copy and paste on the **two URL paths** (see below), Click **Apply** > Click **OK**.

**Open URL Path**: <u>http://ucalgary-primo.hosted.exlibrisgroup.com/openurl/01UCALG/UCALGARY</u> **Authenticate With URL**: <u>http://ezproxy.lib.ucalgary.ca/login?url</u>=

EndNote Preferences		$\times$

Use this screen to control these full text search options:   Image: I	

## **USING CITE-WHILE-YOU-WRITE (CWYW)**

The **CWYW plug-in** installs automatically when you load EN desktop onto your computer. Use CWYW with MS Word to insert references, edit citations and format bibliographies. Within Word > go to the **Endnote 20 tab** 

								Sample Word EN20 - Word

## SHARE REFERENCES

<u>Share Groups with Multiple Users</u>: Highlight a Group to share > click on the dutton > enter the email address/addresses of the people that you would invite in the email box > click the Invite button

<u>Share an entire EndNote Library</u>: Select File on the menu bar > select Compressed Library (.enlx) > email the .enlx file to a recipient who has an active EndNote program

**Copyright:** U of C's licensing agreements restricts sharing PDF's only among UofC Endnote users

## **KEEPING YOUR ENDNOTE LIBRARIES HEALTHY**

- EN libraries consist of two parts: enl file + .data folder. Both parts are needed for the library to work correctly
- EN libraries should **not** be stored in cloud-syncing folders such as **Dropbox**, **Google Drive**, **OneDrive**, **SugarSync** since these can corrupt EN libraries over time
- Microsoft Word documents with EndNote citations contain field codes. Always save as Word documents. Saving a Word document in another format, such as an **OpenOffice (.odt)** format can cause corruption or erasure of the codes.

## ENDNOTE SOFTWARE SUPPORT AND TRAINING

For in-depth support, contact EndNote Technical Support at: <a href="https://endnote.com/contact/">https://endnote.com/contact/</a>

Consult the University of Calgary library <u>EndNote Citation Tool</u> guide for customized resources – i.e. recordings based on EndNote sessions
